

OUR OCEAN PLEDGE

“The protection of the world’s ocean is of particular importance to us. As well as being our planet’s life support system, it greatly enriches the environment of our island jurisdictions and the wellbeing of their local communities. This is why we consider that ‘Life Below Water’, the United Nations Sustainable Development Goal 14, is core to our everyday activities. We are committed to embedding sustainable practices into our culture and we pledge to protect the ocean by: a. engaging in local conservation activities; b. supporting the work of organisations dedicated to marine conservation; and c. helping to reduce the level of waste in our ocean by hosting beach cleans and promoting the adoption of the waste hierarchy across our offices to reduce, reuse, recycle and recover our waste.”
